

Did You Know?

**Did you know that your purchases via your credit card will soon be linked to your environmental choices and behaviours?**

As seen with the Chinese Communist Party's social credit score, worldwide purchases, including Australia, will be controlled and monitored by the banks, corporations and the government.

**Did you know that Fear Sells. Hidden camera reveals Charlie Chester, CNN Technical Director, admitting that the next pandemic for CNN, is to push the Climate Crisis Agenda.**

**California – Concerned Experts at county meeting discuss Chemtrails and Geo-Engineering**

This 12-minute video shows experts in their fields speaking about chemtrails, analysis of soil and air samples, the extremely excessive levels of toxins and poisons being sprayed in our skies, onto our earth. These poisons are affecting not only humans, but plant life, insects, birds, animals and fish. The experts include a former commercial airline pilot, former military meteorologist, doctors, pilots, Defence industry technician, a speaker from Union of Concerned Scientists, and a United States Forest Service Biologist. An excellent brief summary of what is being illegally done to our planet and your health.

**Did you know that there is a global push for lab-grown and plant-based meat to replace the real thing via the United Nations Food and Agricultural plans?**

Vegans may celebrate this, but the majority of Australia and the world are now being punished for their traditional hunter/gatherer diets. This UN measure in turn will starve 80 Million people of protein. The UN will abolish small farms, eliminating global food chains that have fed the world for hundreds of years. We will see megafarms control the production and volume of meat, in the name of science.

Did you know that there are no fossils in fossil fuels and that oil is the 2nd most abundant liquid on Earth after water, and regenerates within the Earth faster than it could ever be depleted?

Col Fletcher Prouty whom served as Chief of Special Operations for the Joint Chief of Staff under President John F Kennedy and former Airforce Colonel, explains how oil was falsely classified a “fossil fuel” by scientists who were paid to make these claims by John D Rockefeller at the Geneva Convention in 1892 to create the idea of oil scarcity.

Did you know that in October 2015 NASA recorded MASS gains of Antarctic Ice sheets greater than its losses.

Although alarmists often cite the melting of polar ice sheets, and a modest decline of Arctic ice sheets in recent years, this decrease has been entirely compensated for, by the **INCREASE** of Antarctic ice-sheet expansion. The rate of sea-level rise has been relatively steady through the twentieth century. In the past few decades, the **RATE** of sea-level rise has likewise not increased.

Dr Shiva, the inventor of e-mail, explains why The Paris Accord is good for no-one.

The Paris Accord was developed, not to help mother nature or fight climate change as presented, but rather to make people like Al Gore, Bill Gates, the elite rich and corporations, much richer.

Otherwise known as the carbon tax, the Paris Accord saddles countless countries and the people world-wide with massive debt. This will lead to the global population being under the thumb of just a handful of powerful ruling families and corporations, for no other reason than increasing profits, and ultimately giving them power and control over us all.

[www.itsy.pub/danpena](http://www.itsy.pub/danpena)

Did You know?

- That a mere 55 thousand years ago, the world was 2 degrees Celsius warmer than it is today.
- If global warming happens as predicted, 10 feet is the minimum projected sea level rise. The worst case is a 100 feet sea level rise. If the sea level rises only 10 feet, Sydney will be gone, Southern America will be gone, England will be gone, and most of Europe will be gone.

Would you **REALLY** be able to get a 30-year mortgage or even mortgage insurance if global warming was real? It's almost as if the banks and insurance companies don't believe in Global Warming.
