Did you know that your Smart Air-Con can be overridden and turned off by your energy provider?

Residents were prevented from adjusting their own thermostat/ Air-Con in their homes. Smart meters, Smart Cities and Smart appliances, are all connected to the 'Internet of Things' (IOT), which is an internet control system to which everything is connected via satellite. Your utilities can be controlled remotely, blocking you from accessibility to your smart-connected appliances.

[www.itsy.pub/foodrationing](http://www.itsy.pub/foodrationing)

Countries are rolling out food-rationing schemes in return for the new Biometric Digital ID

This is occurring in Iran right now and is intended to be globally rolled out via the World Economic Forum and United Nations. This means the government and mega corporations controlling who gets to eat, while they track and trace your consumption and movement. "If you control food, you control the people", as stated by Henry Kissinger.

# Did You Know?

[www.itsy.pub/greenenergylie](http://www.itsy.pub/greenenergylie)

## Did you know that we are being lied to about what is sustainable and green energy?

The Sustainable Environment catchphrase is just another word for corporate theft and high taxation. Emerging technologies, such as Artificial Intelligence (AI), will accelerate and support the global energy transition, which will INCREASE the usage of fossil fuels to run green energy systems, as global demand for materials such as lithium, cobalt and copper continue to increase. So, who's lying here about this being a "green low emission plan"? The hypocrisy is that while countries are racing towards public crackdowns on energy and resource usage, the mega corporates, governments and the very powerful flout their lavish lifestyles and jet-setting off to Environmental Summits.

## Food sources are being destroyed in a siege to induce a 'DELIBERATE FAMINE' across the world

Shortages caused by 'coincidental' events globally see us spearheading into a massive fuel and essential agricultural resource depletion. Mysterious fires, alleged bird flu outbreaks, bee disease - varroa mite and other inexplicable events, have killed off food and livestock, and has destroyed crucial infrastructure. Since the end of April 2021, at least 96 farms, food processing plants and distribution centres across the U.S alone have been damaged or destroyed. In one instance there were over 5.3 million egg-laying chickens killed.

[www.itsy.pub/landgrab](http://www.itsy.pub/landgrab)

## Did you know that the biggest Global Government land-grab in over 200 years is underway?

Build Back Better and Smart Cities are based on removing people from the rural areas via "resilience" planning, forcing rural and urban habitation into "precincts" of high density communities. The plan is to remove all fuel vehicles off the road, and replaced with electric cars/public transport and bike/walk-based services within 15 mins of home. Though it may appear to be pro-social, the bigger underlying picture is cause for alarm.

## Did you know that our natural resources are being sold onto the stock market to private investors and venture capitalists?

This is being managed by our Australian and international banks and investment companies via the Stock Market where all our natural resources are listed for sale. Natural Assets Companies (NAC) are corporations that will hold the rights to the ecosystem's resources produced by natural or working landscapes. Natural ecosystems are becoming not simply publicly owned and accessed commons, but is now an investible traded asset for corporate ownership.
