Did You Know?

100% of Australia's drugs are regulated by THE TGA, which is 96% funded by BIG PHARMA

The TGA is a government body that is responsible for regulating therapeutic goods including prescription medicines, vaccines and medical devices.

Conflict of interest?

96% of its funding comes from the companies whose products it is tasked to evaluate.

Safety signals ignored

Why is the TGA ignoring unprecedented adverse event notifications to its own database?

Are studies manipulated?

Are medications that generate more profit for big Pharma favoured by those with financial conflicts of interest?

Does money talk?

Australian vaccine developer says his vaccine wouldn't be supported unless he matched the millions donated by lobbyists.
